JY-203 Amino silicone oil

1. product description

JY-203 Amino series silicone oil was used as the high-grade softener in textile finishing , different fabric and finishing style can choose the corresponding model of this series to get satisfactory effect.

2. The product features

1), because of amino modified, make the fabric more plentiful, softer and smoother and excellent resistance to water after treatment, at the same time, which can improve the fabric's physical properties, such as tearing strength, water resistance and rebound resilience.

2). simple emulsifying process, can be emulsified into different transparent microemulsion by adopting appropriate emulsifier

3), used in cosmetics, improve hair combed ,Slippery and shining .

3. product main technical index

Appearance:	colorless transparent faintly yellow liquid
Viscosity: (25 °C, cs)	600-1000000 according to clients' demand
pH value:	8 ~ 9
Refraction index:	1.403 ~ 1.409
Ammonia value:	0.1/0.3 /0.6/ 0.9/1.2
Specific gravity(25 °C) :	0.98

4. product specification, type

ITEM NO	JY-203A	JY-203B	JY-203C	JY-203D	JY-203E	JY-203F
SPECIFICATION	Special slide type	Smooth type	general type	Soft type	Special soft type	Close water type

5. packing and shipping

1, products stored in clean, airtight 200kg plastic coated iron and 50kg plastic, placed in ventilation, dry place.

2, the products according to the non-dangerous goods and shipping.
